

Supplementary Figure 2. GO enrichment analysis for the metatranscriptome profiles of the oral microbiome associated with cancer status; Under-represented Biologic processes.

Enriched terms obtained using Goseq were summarized and visualized as a scatter plot using REVIGO.

Summarized GO terms in PT tumor [tumor site] vs. CT tumor-matched site [control tumor].

Circle size is proportional to the frequency of the GO term, while color indicates the log₁₀ P value (red higher, green lower).
