

Trends in Molecular Medicine

February 2018, Volume 24, Number 2, pp. 103–236

*Special Issue: Biomarkers of
Substance Abuse*

Editorial

- 103 **Finding the Roots: Molecularly Tracking Substance Addiction** Catarina Sacristán

Spotlight

- 106 **HDAC5 Regulates the Formation of Drug Memories** *Alexander C.W. Smith and Paul J. Kenny*

Opinions

- 109 **Defining Substance Use Disorders: The Need for Peripheral Biomarkers** *Kristopher J. Bough and Jonathan D. Pollock*
- 121 **Addiction Biomarkers: Dimensional Approaches to Understanding Addiction** *Laura E. Kwako, Warren K. Bickel, and David Goldman*
- 129 **Functional Neurocircuits and Neuroimaging Biomarkers of Tobacco Use Disorder** *Matthew T. Sutherland and Elliot A. Stein*
- 144 **Aldehyde-Induced DNA and Protein Adducts as Biomarker Tools for Alcohol Use Disorder** *Helen M. Heymann, Adriana M. Gardner, and Eric R. Gross*
- 156 **Cannabinoid Markers in Biological Fluids and Tissues: Revealing Intake** *Marilyn A. Huestis and Michael L. Smith*
- 173 **Central and Peripheral Biomarkers of Stress Response for Addiction Risk and Relapse Vulnerability** *Verica Milivojevic and Rajita Sinha*
- 187 **Preparing the Way: Exploiting Genomic Medicine to Stop Smoking** *Laura J. Bierut and Rachel F. Tyndale*
- 197 **Using Metabolomics to Investigate Biomarkers of Drug Addiction** *Reza Ghanbari and Susan Sumner*

(Contents continued)

- 206 **Focusing on the Opioid System
for Addiction Biomarker Discovery** *Raoul Belzeaux,
Laurence Lalanne, Brigitte L. Kieffer,
and Pierre-Eric Lutz*
- 221 **Biosignature Discovery for Substance
Use Disorders Using Statistical
Learning** *James W. Baurley,
Christopher S. McMahan,
Carolyn M. Ervin, Bens Pardamean,
and Andrew W. Bergen*

On The Cover: Our February special issue on “Biomarkers of Substance Abuse” explores recent advances on the molecular details and experimental approaches geared towards better identifying peripheral biomarkers of substance use disorders (SUDs). The timely collection brings together discussions on current methodology and data analytical tools for biomarker discovery and molecular targeting in alcohol, nicotine, marijuana, cocaine and opioid addiction. Cover illustration by istock/GeorgePeters; design by Catarina Sacristán.
