

Additional file 14. Flow cytometric analysis of TNF- α in NK-cells

Additional figure S9. Flow cytometry showing intracellular TNF- α production in CD56 dim NK cells, but not in CD56 bright NK cells. NK cells from healthy donors were cultivated in the presence of RNA-containing immune complexes (RNA-IC) for 5 hours. Red: CD56 bright NK cells, blue: CD56 dim NK cells. No cytokines were detected in cell cultures in the absence of RNA-IC.

The dot plot represents one individual donor of four analyzed.
