Appendix A:

Pediatric Insulin Calculator User Feedback

The MiChart pediatric insulin calculator tool was developed to assist the patient care team in determining more accurate insulin doses to provide hyperglycemia correction, carbohydrate coverage, and ketone correction. You received this survey because you have used the insulin calculator within MiChart in some capacity. Please consider taking this short survey to provide feedback regarding your experience and perception of the insulin calculator tool. Participation in this survey is voluntary and all data collected will be kept confidential. Your input will help us identify areas for future improvement.
