

Supplementary Data

SUPPLEMENTARY FIG. S1. Impact on Health-Related Quality of Life (SF-36). Letters denote statistical difference at 90% confidence between cohorts, where A indicates a significant difference versus the at-risk cohort and D indicates a significant difference versus diagnosed cohort. The *n* values reflect the unweighted base; mean values are based on the weighted base. HRQOL, health-related quality of life; SF-36, 36-Item Short Form Survey.
