eTable. List of data sources arranged by country

This supplementary material has been provided by the authors to give readers additional information about their work.

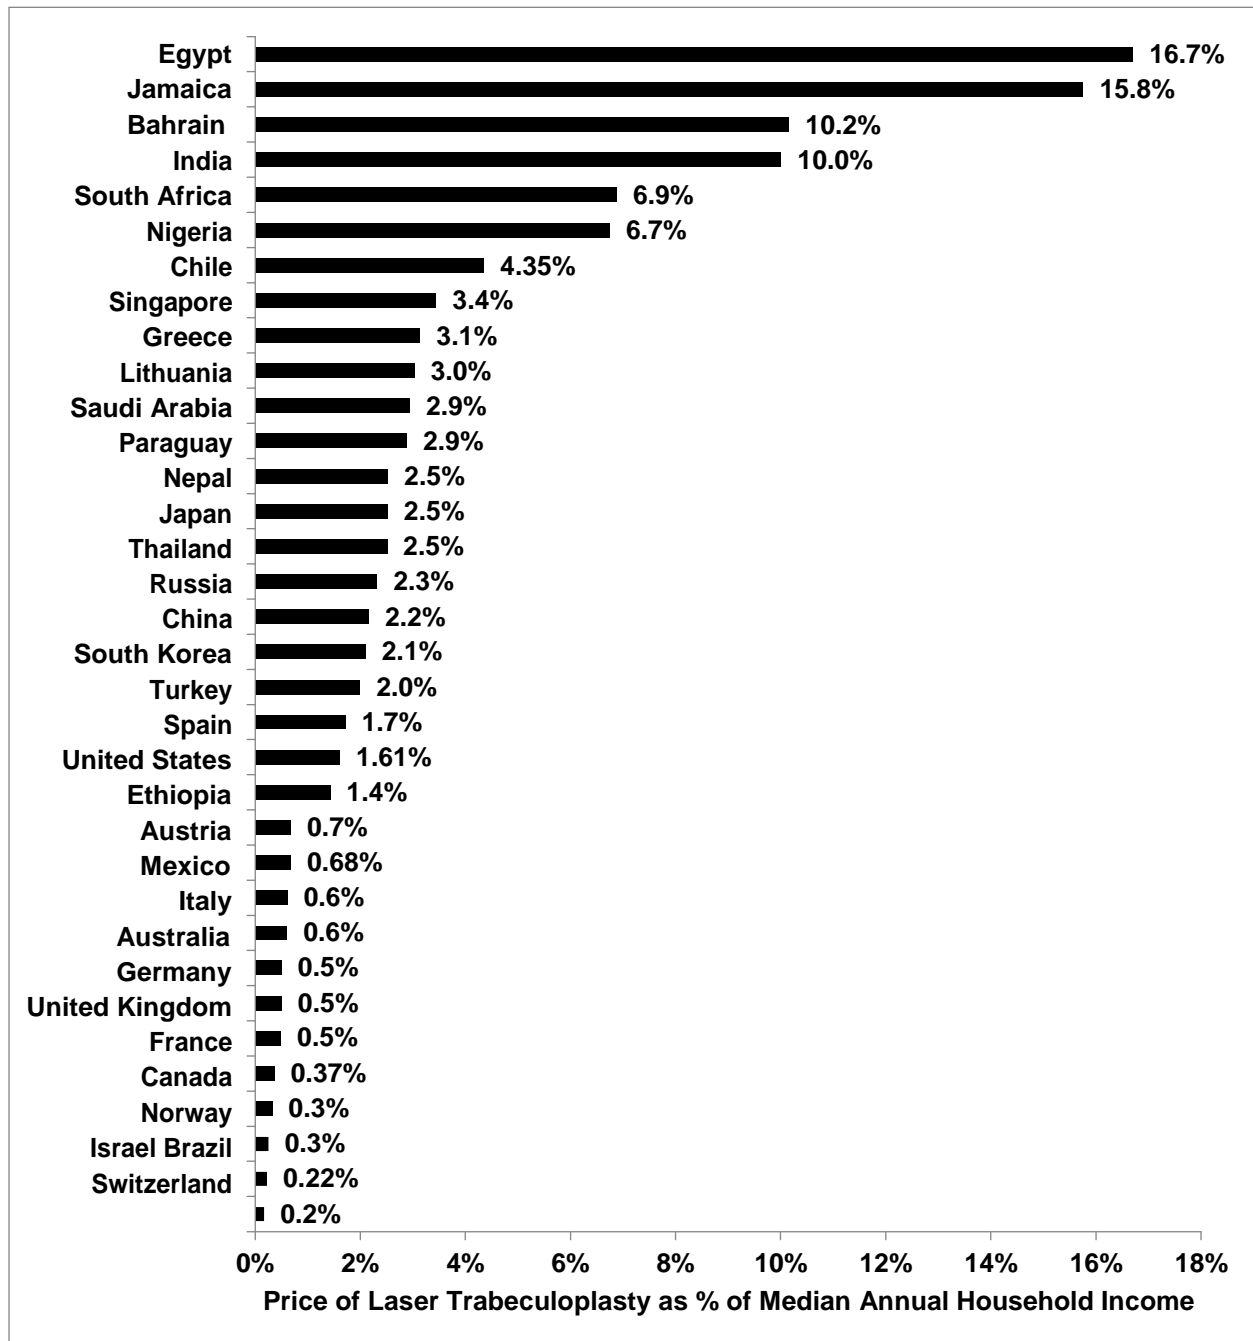

eFigure 1. Price Ratio of Brand Name Xalatan versus Generic Latanoprost

In countries with pricing data available for brand name latanoprost (Xalatan) and generic latanoprost, the price of Xalatan was divided by the price of generic latanoprost.

eFigure 2. Cost of Laser Trabeculoplasty as a Percentage of Median Annual Household Income

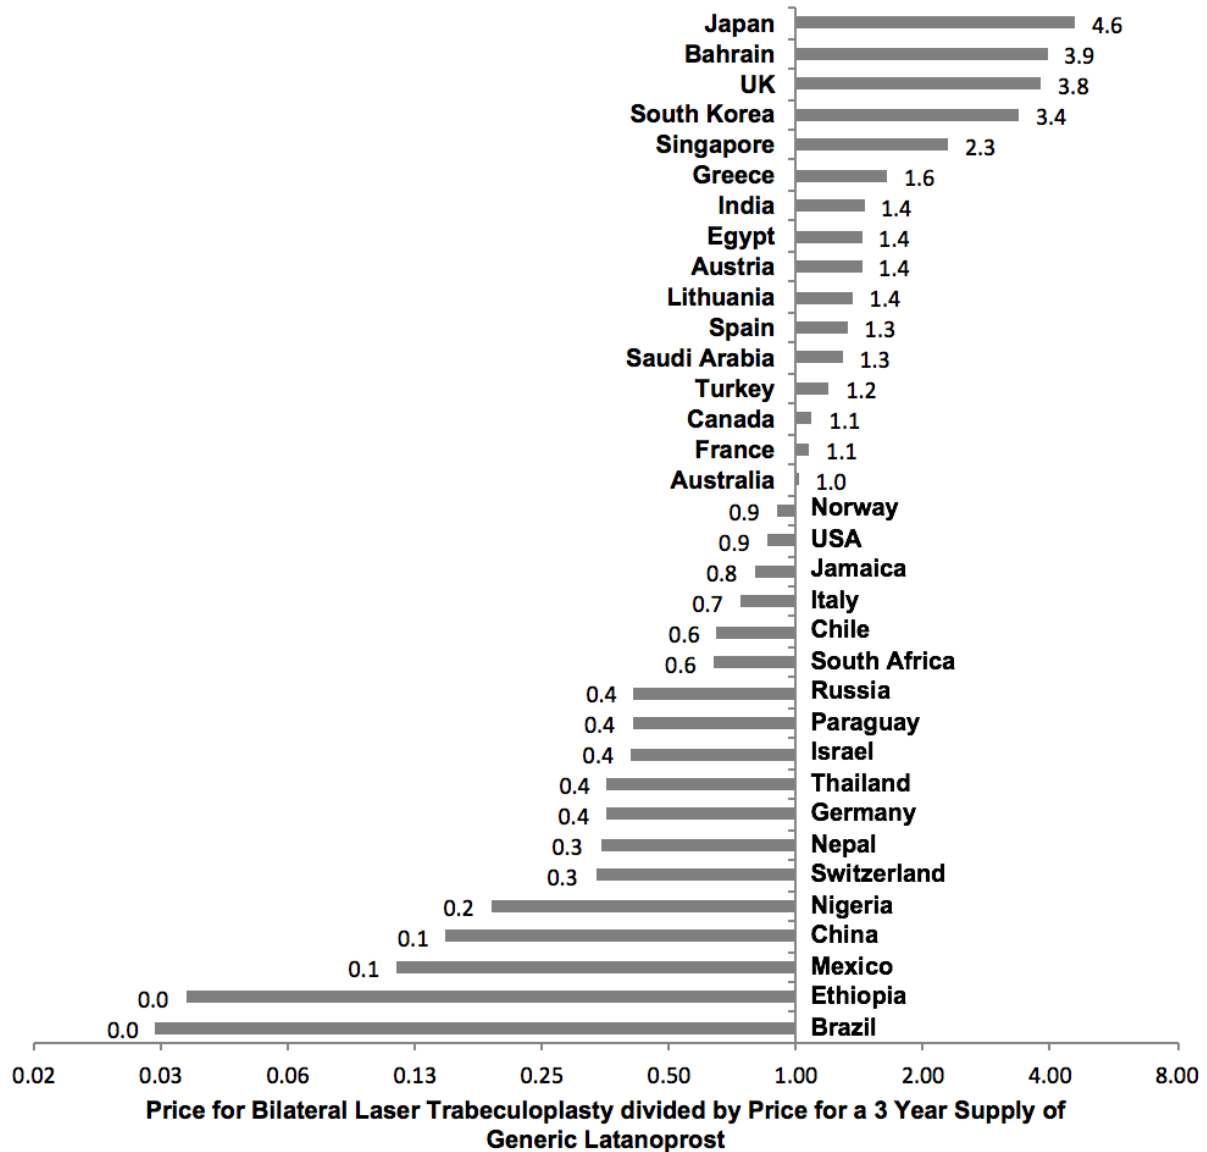

Prices for laser trabeculoplasty were divided by the median annual household income in each country and expressed as a percentage. Data not available for Guatemala, United Arab Emirates, and Qatar.

Prices are reported as individually charged laser procedures per eye.

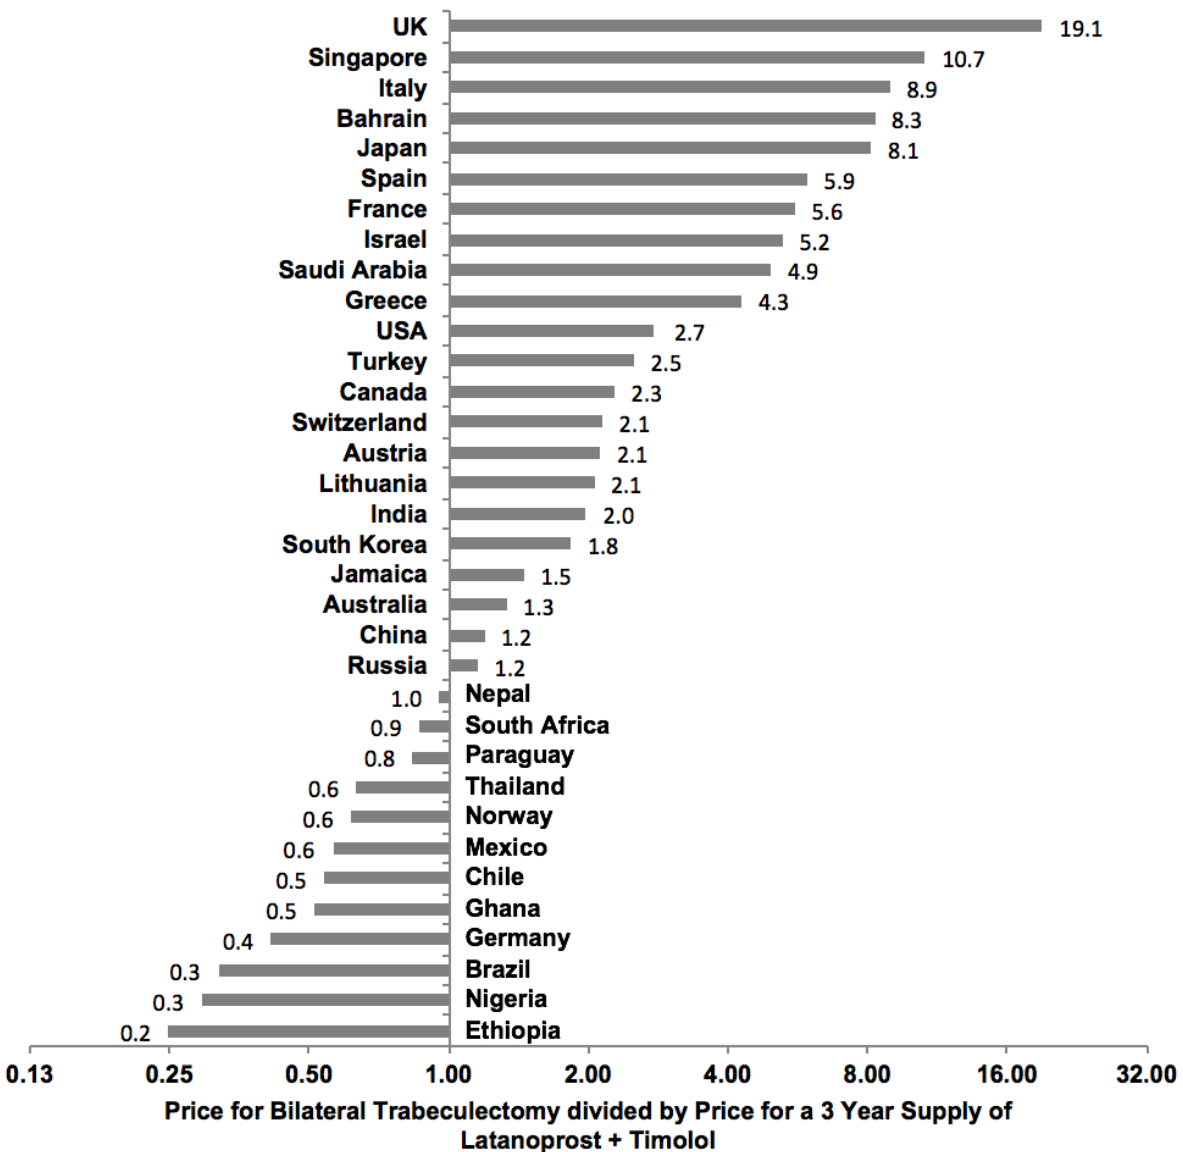

eFigure 3. Price Ratio of Trabeculoplasty versus Latanoprost Therapy

Prices were computed for bilateral laser trabeculoplasty procedures and divided by prices for a three-year supply of generic (or brand name if generic not available) latanoprost therapy to obtain cost ratios for each country.

eFigure 4. Price Ratio of Trabeculectomy versus Latanoprost + Timolol Therapy Prices

These prices were computed for bilateral trabeculectomy procedures and divided by prices for a three-year supply of generic (or brand name if generic not available) latanoprost + generic timolol therapy to obtain cost ratios for each country.
