

Figure S5. Logo representation of the consensus sequences (30 nts) around the 5' and 3' extremities of the mRNA fragments identified at intron circle splice junctions. The EBS1-IBS1 and EBS2-IBS2 base pairing interactions for Ll.LtrB- Δ LtrA+LtrA and Ll.LtrB-WT (**a**) as well as Ll.LtrB-EBS1/Mut- Δ LtrA+LtrA (**d**) are depicted. The consensus (Figure 3, S1) and adjusted consensus (Figure S2-S4) sequences are shown for Ll.LtrB- Δ LtrA+LtrA (**b**), Ll.LtrB-WT (**c**) and Ll.LtrB-EBS1/Mut- Δ LtrA+LtrA (**e**).
