

**Supplementary Table 3.** Number of reads from DNA mNGS library aligning to bacterial sequences. Results are shown from both the patient's sample, NTC, and the PC sample.

\*re-classified to a higher taxonomic rank because reads aligned equally well to multiple different organisms that shared the same species, genus or family

Abbreviations: NTC, no template control; PC, positive control; CSF, cerebrospinal fluid; mNGS, metagenomic next-generation sequencing

species	genus	family	# of Reads		
			DNA NTC	DNA PC	DNA Patient CSF
*	Brucella	Brucellaceae	0	0	251
