

## Author's Response To Reviewer Comments

Close

We are very much thankful to you handling this MS as well as the acceptance of our MS for publication in GigaScience. We are also thankful to you and two reviewers for appreciation of our work. We addressed all the comments of two reviewers, as a result, we have updated the gene set, several main text and supplementary files. As suggested, we have prepared point-by-point response to each concern/comment. We have uploaded the revised version of the MS, the response to the comments, as well as the process results files into GigaDB. We uploaded a protocol file and a One-to-one-response-letter.
