Description of Additional Supplementary Files

File Name: Supplementary Data 1
Description: Results of model fitting and protein classification applied to paired mRNA/protein data: The table contains data for 3761 mRNA/protein pairs as well as relevant results obtained from the model fitting and protein classification analysis. A detailed description of each column is given in sheet 2 of the excel file. While f1 denotes results obtained using the full dataset, f2 indicates results obtained from analyzing post MZT (3h-20h) data only.
