|     |                           |                            |                |                             |  | under AB   | treatment   |                            |
| 15  | 48, m                     | UwO, 2013                  | Foot           | Abscess, wound<br>secretion | <i>C. aurimucosum</i> , <i>C. amycolatum</i> ,<br><i>Streptococcus agalactiae</i> ,<br><i>Staphylococcus caprae</i>  | Yes        | Amputation  | Vancomycin (iv)            |
| 16  | 51, m                     | UwO,<br>(pressure)<br>2013 | Gluteal        | Wound<br>secretion          | <i>Corynebacterium auris</i> ,<br><i>Klebsiella pneumoniae</i> ,<br><i>Enterococcus faecalis</i> ,<br><i>S. epidermidis</i> ,<br><i>Actinomyces turicensis</i> | No         | Debridement | Ertapenem/amoxicillin (iv) |

<sup>a</sup> age at diagnosis, AB, antibiotics; PJI, periprosthetic joint infection; OIAI, orthopedic implant-associated infections; STI, soft tissue infection; U, ulcer; UwO, ulcer with osteomyelitis, DAIR, debridement, antibiotics and implant retention, MR, methicillin resistant; wks, weeks; S, susceptible; R, resistant.

**Supplementary Table S2.** Antibiotic susceptibility testing (AST) of the four most frequently isolated *Corynebacterium* from orthopedic and blood culture samples (2011-2015) using EUCAST breakpoints (1).

| Species   | Susceptible isolates (%) |     |     |     |     |     |                  |                  |
|---|--------------------------|-----|-----|-----|-----|-----|------------------|------------------|
|   | GEN <sup>1</sup>         | PEN | TET | VAN | CIP | CLI | LZD              | RIF              |
| <i>Corynebacterium amycolatum</i> (n=10)        | 50                       | 20  | 100 | 100 | 20  | 10  | 100 <sup>2</sup> | 80 <sup>2</sup>  |
| <i>Corynebacterium tuberculostearicum</i> (n=9) | 56                       | 22  | 89  | 100 | 11  | 0   | 100 <sup>2</sup> | 50 <sup>2</sup>  |
| <i>Corynebacterium afermentans</i> (n=8)        | 88                       | 38  | 88  | 100 | 75  | 0   | 100 <sup>2</sup> | 100 <sup>2</sup> |
| <i>Corynebacterium striatum</i> (n=7)           | 86                       | 0   | 57  | 100 | 29  | 14  | 100 <sup>2</sup> | 100 <sup>2</sup> |

<sup>1</sup> GEN, gentamicin; PEN, penicillin; TET, tetracycline; VAN, vancomycin; CIP, ciprofloxacin; CLI, clindamycin; LZD, linezolid; RIF, rifampin.

<sup>2</sup> AST data available only for a subset of isolates: *C. amycolatum*, LZD n=4, RIF n=5; *C. tuberculostearicum*, LZD n=5, RIF n=6; *C. afermentans*, LZD n=2, RIF n=3; *C. striatum*, LZD n=1, RIF n=2.
