

**Figure S1:** Comparison of read coverage across the A2 region (LdBPK\_220670, LdBPK\_220006700 in PacBio) in chromosome 23 of six CL-SL and two VL-SL clinical isolates. Reads were aligned to the new PacBio sequence of *L. donovani*. Only one SNP shared among the two groups of isolates was identified. Viewed using the IGV tool.
