

Annexure 2. Data fields extracted for overview of reviews

Component	Specific data extracted
Metadata	First Author
	Date
	Title
	Source (journal, volume, issue, page range)
	Abstract
	Source
Overview of the review	Type of review, according to authors: systematic review, synthesis, literature review, review of case studies, etc.
	Interventions
	Outcomes of interest
	# papers identified
	# papers from LMICs
	Regional considerations (LMIC, HIC or global)
	Primary focus
	Main research question
Main findings	
Strategies for strengthening civic engagement and local accountability including health committees	Describe interventions relevant to civic engagement & local accountability including health committees
	What is the evidence regarding effectiveness of the intervention?
	What findings if any are there about how the policy environment and institutional structures supported or undermined the intervention?
	What findings, if any, are there on how implementation of the intervention proceeds, and possible barriers or facilitators to the intervention?
	Other important findings
Decentralization or devolution	Describe interventions relevant to decentralization or devolution
	What is the evidence regarding effectiveness of the intervention?
	What findings if any are there about how the policy environment and institutional structures supported or undermined the intervention?
	What findings, if any, are there on how implementation of the intervention proceeds, and possible barriers or facilitators to the intervention?
	Other important findings
Community score cards	Describe interventions relevant to community score cards
	What is the evidence regarding effectiveness of the intervention?
	What findings if any are there about how the policy environment and institutional structures supported or undermined the intervention?
	What findings, if any, are there on how implementation of the intervention proceeds, and possible barriers or facilitators to the intervention?
	Other important findings
Strategies to promote	Describe interventions relevant to promoting transparency about the performance of local health systems

Component	Specific data extracted
transparency about the performance of local health systems	What is the evidence regarding effectiveness of the intervention?
	What findings if any are there about how the policy environment and institutional structures supported or undermined the intervention?
	What findings, if any, are there on how implementation of the intervention proceeds, and possible barriers or facilitators to the intervention?
	Other important findings
Internal accountability	Describe interventions relevant to promoting health system accountability which is internal to the health system (i.e. if does not involve outside stakeholders, does not increase transparency to those outside the system)
	What is the evidence regarding effectiveness of the intervention?
Conclusions and reflections	What do the authors say about the overall quality of the papers included?
	What do the authors say about the implications for future research and research priorities?
	What do the authors say about implications for policy and practice
	Data extractor comments on the quality of the review
