

Supplementary Materials: Synthesis, Molecular Modelling and Biological Evaluation of Novel Heterodimeric, Multiple Ligands Targeting Cholinesterases and Amyloid Beta

Michalina Hebda Marek Bajda, Anna Więckowska, Natalia Szałaj, Anna Pasieka, Dawid Panek, Justyna Godyń, Tomasz Wichur, Damijan Knez, Stanislav Gobec and Barbara Malawska

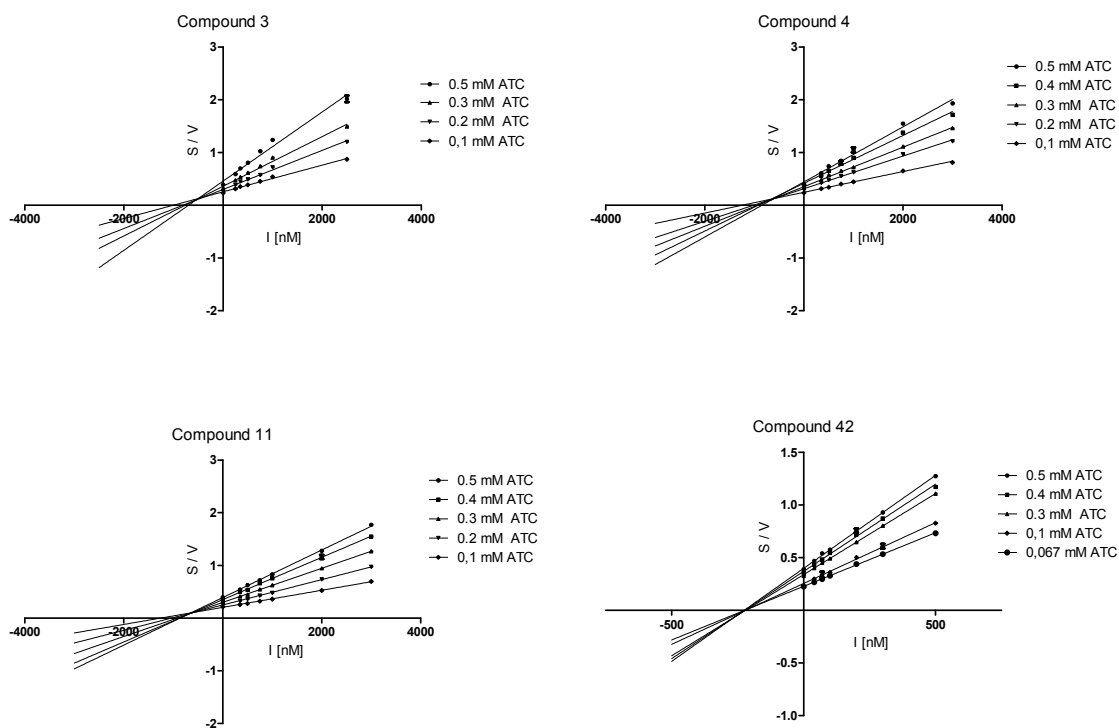

Figure S1. Cornish–Bowden plots illustrating mixed type of *EeAChE* inhibition by compounds **3**, **4**, **11** and non-competitive type of *EeAChE* inhibition by compound **42**. I = inhibitor concentration; S = substrate concentration, V = initial velocity rate.
