

Figure S2

Figure S2: SOD2 expression in CD34+ cells from PMF patients and healthy donors.

SOD2 expression level was assessed by microarray analysis in 42 PMF patients and 16 healthy donors by means of Affymetrix platform as previously described (Norfo et al., 2014).

Mann–Whitney U test: **, $P < .01$ versus CTR, 2-tailed student t-test.

Abbreviations: SOD2, superoxide dismutase 2; CTR, healthy donors; PMF, primary myelofibrosis.
