

The preferential arrangement of lipids in the long periodicity phase stratum corneum matrix model

C.M. Beddoes¹, G.S. Gooris¹, J.A. Bouwstra^{1*}

Supplemental Figure S3 ν curves of (A) dFFA, (B) LB-dNS/dC24 and (C) LB-dNS/dFFA. CD₂ curves (■) and CH₂ curves (●) show transition from ordered to disordered phase at the same temperature for each sample.
