1 **Supplementary figure 3**

Supplementary Figure 3. Variety of inflorescence and flower development in 3KO PIN1::PIN1-GFP plants. The irregular architecture of (A) primary inflorescence and (B) axillary (secondary) inflorescence of 3KO PIN1::PIN1-GFP plants. (C) Post-anthesis flowers were dissected from primary inflorescence (A) according to developmental sequence. Notice the variability of under- and undeveloped flowers. Scale bar is 1mm.
