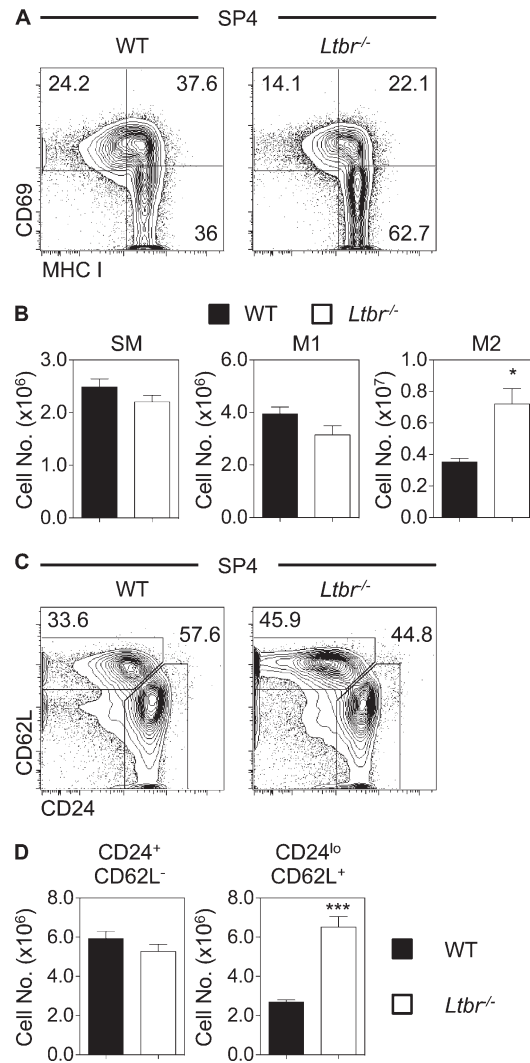

Figure S1. **Selective accumulation of mature SP4 thymocytes occurs in germline *Ltbr*^{-/-} mice.** (A and B) Analysis of CD69 and MHC I expression on CD4⁺CD8⁻TCRβ^{hi}CD25⁻ SP4 thymocytes in WT (black) and *Ltbr*^{-/-} (white) mice. (C and D) Analysis of CD24 and CD62L expression on SP4 thymocytes in WT (black) and *Ltbr*^{-/-} (white) mice (*n* = 4 pooled from two independent experiments). An unpaired Student's *t* test was used for all statistical analysis. All bar charts and error bars represent means ± SEM. *, *P* < 0.05; ***, *P* < 0.001.
