A.

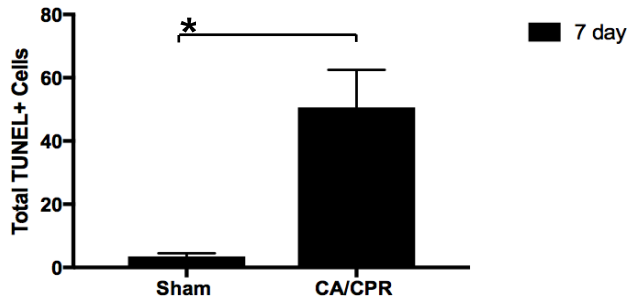

SHAM

CA/CPR

B.

Supplemental Figure 1. TUNEL expression is increased after cardiac arrest. A. Representative images of CA1

region co-labeled with TUNEL (red) and Hoechst (blue) from 7 day Sham and 7 day CA/CPR. B. Quantification of

TUNEL+ cells per field of view in CA1 region of hippocampus, showing increased cell death following cardiac

arrest. Data represent mean \pm SEM, * $p < 0.05$, scale bar= 100 μ m.
