

Figure S8. The hairpin structures of miR-n033b and their expression

The hairpin structures of (A) can-miR-n033b, (B) stu-miR-n033b and (C) sly-miR6027, respectively. Color indicates the possibility of base-pairing. (D-F) Small RNA mapping results on the homologous region of miR-n033b in pepper, potato and tomato, respectively.
