GigaScience

Dear Dr Swarbreck,

I see our curation team have now released your dataset accompanying your manuscript

GIGA-D-18-00126

Efficient and accurate detection of splice junctions from RNA-Seq with Portcullis

I've just seen the DOI which needs to be added to your paper in the references list and also cited under "availability of supporting data".

As your manuscript is created in latex, I'm unable to add this information myself before sending to production. Can you please edit your paper and add the DOI and data sentence as per the PDF marked up attached?

Final revisions to be made are:

1. Add a final sentence under "Availabililty of supporting data" to read as "Snapshots of the code and other supporting data are available in the GigaScience repository, GigaDB [27]."

2. Add GigaDB DOI citation as reference 27:

27. Mapleson DL; Venturini L; Kaithakottil GG; Swarbreck D: Supporting data for "Efficient and accurate detection of splice junctions from RNA-Seq with Portcullis" GigaScience Database. 2018. <http://dx.doi.org/10.5524/100519>

The due date for submitting the revised version of your article is 19 Oct 2018.

Please upload your new version and associated files - then I will send it to Production.

Best wishes

Nicole
