

# Supplemental Figure S4.

Progression free survival  
by response

Progression free survival  
by three-miRNA signature prediction

HR (95% CI)	P value	HR (95% CI)	P value
1.88 (1.23-2.94)	0.0031	1.46 (0.97-2.24)	0.070

Supplemental Figure S4. Progression-free survival of responders (R) and non-responders (NR) in all subjects (combined test and validation cohorts). The Kaplan-Meier log rank test was performed. Lower panel shows the results of Cox regression analysis. Hazard ratios (HRs) of (predicted) NR against (predicted) R are shown
