Linear regression models – continued

PREDIAGNOSIS PHASE

Parameter	Parameter Estimate	Standard error	P-value
Prediagnosis phase – total cost model			
Intercept	-161.88817	56.72401	0.0043
Year	17.24651	1.4078	<.0001
Age	10.42334	0.73743	<.0001
Prediagnosis phase – patient liability cost model			
Intercept	-34.67437	5.5127	<.0001
Year	1.00019	0.13682	<.0001
Age	1.45677	0.07167	<.0001

SURGERY PHASE

Parameter	Parameter Estimate	Standard error	P-value
Surgery phase – total cost model			
Intercept	34471	612.31495	<.0001
Year	-257.34871	94.97436	0.0067
Surgery phase – patient liability cost model			
Intercept	1363.60608	30.89565	<.0001
Year	22.05216	4.79213	<.0001
Operative death – total cost model			
Intercept	149010	8975.8405	<.0001
Year	3614.24227	1461.0392	0.0135

Linear regression models – continued

STAGING PHASE: Stage I, II NSCLC

Parameter	Parameter Estimate	Standard error	P-value
Best supportive care – total cost model			
Intercept	-4052.62999	2472.0802	0.1012
Age	153.18426	31.60036	<.0001
Best supportive care – patient liability model			
Intercept	-842.887	253.2983	0.0009
Age	21.71117	3.23789	<.0001
Radiation – total cost model			
Intercept	16900	2910.8215	<.0001
Age	-102.30212	36.87958	0.0056
Radiation – patient liability cost model			
Intercept	1304.694	51.57009	<.0001
Year	-25.4311	7.1608	0.0004
Chemotherapy + radiation – total cost model			
Intercept	17000	3478.5806	<.0001
Age	-120.34813	46.21619	0.0093
Chemotherapy + radiation – patient liability cost			
No significant predictors. SD = 1069			

Linear regression models – continued

STAGING PHASE: Stage III NSCLC

Parameter	Parameter Estimate	Standard error	P-value
Best supportive care – total cost model			
Intercept	-4022.71436	2906.0321	0.1664
Age	194.03953	36.95381	<.0001
Best supportive care – patient liability cost model			
Intercept	-803.621	309.8075	0.0095
Age	24.40427	3.93959	<.0001
Radiation – total cost			
No significant predictors. SD = 15540			
Radiation – patient liability cost			
No significant predictors. SD = 1390			
Chemotherapy – total cost			
No significant predictors. SD = 13227			
Chemotherapy – patient liability cost			
Intercept	1286.51	37.09647	<.0001
Year	-24.3272	6.17	<.0001
Chemotherapy + radiation – total cost model			
Intercept	17752	2552.7498	<.0001
Age	-114.7186	34.35076	0.0008
Chemotherapy + radiation – patient liability cost model			
Intercept	1456.53	32.81529	<.0001
Year	-30.1217	4.8651	<.0001

Linear regression models – continued

STAGING PHASE: Stage IV NSCLC

Parameter	Parameter Estimate	Standard error	P-value
Best supportive care – total cost model			
No significant predictors. SD = 23473			
Best supportive care – patient liability cost			
No significant predictors. SD = 2258			
Radiation – total cost model			
Intercept	42028	7689.6185	<.0001
Age	-384.63833	100.757	0.0001
Year	-2220.44811	1084.5337	0.0407
Age*year interaction	30.46413	14.05493	0.0303
Radiation – patient liability cost model			
Intercept	3592.16	680.481	<.0001
Age	-27.3405	8.91634	0.0022
Year	-310.945	95.97415	0.0012
Age*year interaction	3.83828	1.24377	0.002
Chemotherapy – total cost model			
Intercept	28996	4332.0333	<.0001
Age	-252.64527	57.465	<.0001
Chemotherapy – patient liability cost model			
Intercept	2330.385	320.6435	<.0001
Age	-14.2002	4.26111	0.0009
Year	-27.1019	7.32543	0.0002
Chemotherapy + radiation – total cost model			
Intercept	23602	2468.1868	<.0001
Age	-163.12211	33.37285	<.0001
Year	-150.36202	51.05097	0.0032

Linear regression models – continued

Continued – STAGING PHASE: Stage IV NSCLC

Parameter	Parameter Estimate	Standard error	P-value
Chemotherapy + radiation – patient liability cost model			
Intercept	2348.931	199.7462	<.0001
Age	-12.6817	2.70081	<.0001
Year	-25.2072	4.13147	<.0001

Linear regression models – continued

STAGING PHASE: Limited Stage SCLC

Parameter	Parameter Estimate	Standard error	P-value
Best supportive care – total cost model			
Intercept	-6058.60985	5475.7994	0.2687
Age	192.22943	70.82557	0.0067
Best supportive care – patient liability cost model			
Intercept	-995.754	445.6626	0.0256
Age	25.02324	5.76433	<.0001
Radiation – total cost model			
No significant predictors. SD=13574			
Radiation – patient liability cost model			
Intercept	1420.079	74.94313	<.0001
Year	-44.6302	11.98831	0.0002
Chemotherapy – total cost model			
No significant predictors. SD=16492			
Chemotherapy – patient liability cost model			
Intercept	1355.077	50.27994	<.0001
Year	-29.5661	9.8051	0.0026
Chemotherapy + radiation – total cost model			
Intercept	20328	3129.8432	<.0001
Age	-132.44477	42.31167	0.0018
Chemotherapy + radiation – patient liability cost model
