

## Supplementary Table I

Clinical variables	FDR adjusted P-value	Spearman correlation coefficient
Nosocomial infection	0.0362	0.27
Multiple organ failure	0.0279	-0.26
Time to recovery	0.0099	-0.30
ICU length of stay	0.0084	-0.28
Hospital length of stay	0.0077	-0.29

**Supplementary Table I. Association between *FCER1A* expression in whole blood and clinical attributes in trauma patients at 7d after severe injury.** The data set was obtained from 167 severely injured patients and compared with 35 healthy subjects (ages 16-55) [<http://web.mgh.harvard.edu/TRT/>]
