

S2 Fig. TUNEL assay on E18.5 dorsal skin. (a and b) TUNEL assay on wild type (*Rpgrip1*^{+/+}) and homozygous (*Rpgrip1*^{-/-}) mutant mice. (c and d) *Rpgrip1*^{+/+} and *Rpgrip1*^{-/-} skins treated with DNase I before subjected to TUNEL assay, as a positive controls. Sections were counterstained with DAPI (blue) to label nuclei. Asterisks indicate intraepidermal blisters. Scale bar, 50 μm.
