

S3 Fig. Junctional proteins in E18.5 epidermis. Immunofluorescence labeling of desmocollins (DSC1, DSC2/3, green), E-cadherin (CDH1, red), α -catenin (CTNNA1, green), and β -catenin (CTNNB1, green) in back skin of E18.5 control (*Rpgrip1*^{+/+}) and homozygous (*Rpgrip1*^{-/-}) mutants. Dotted lines illustrate epidermal-dermal junction. Asterisks indicate intraepidermal blisters. Scale bar, 20 μ m.
