

S2 Table. Correlations between admixture proportion (f_d) and recombination rate

A. Population recombination rate (ρ)

| | population set | all windows | | thinned windows | |
|---------------------|--------------------------|----------------|------------------|-----------------|-----------------|
| | | Spearman's rho | p-value | Spearman's rho | p-value |
| whole genome | 1 (<i>cyd / mel-W</i>) | 0.346 | 1.13E-73 | 0.351 | 4.09E-39 |
| | 4 (<i>tim / mel-E</i>) | 0.484 | 2.43E-152 | 0.494 | 8.17E-81 |
| intermediate rec. | 1 (<i>cyd / mel-W</i>) | 0.188 | 3.77E-14 | 0.158 | 4.63E-06 |
| | 4 (<i>tim / mel-E</i>) | 0.279 | 1.06E-29 | 0.298 | 1.11E-17 |
| fused chromosomes | 1 (<i>cyd / mel-W</i>) | 0.288 | 2.05E-32 | 0.299 | 2.38E-18 |
| | 4 (<i>tim / mel-E</i>) | 0.437 | 5.02E-76 | 0.439 | 1.86E-39 |
| unfused chromosomes | 1 (<i>cyd / mel-W</i>) | 0.303 | 1.79E-22 | 0.322 | 1.16E-13 |
| | 4 (<i>tim / mel-E</i>) | 0.431 | 8.00E-46 | 0.450 | 3.33E-26 |

B. Crossover recombination rate

| | all windows | | | thinned windows | |
|---------------------|--------------------------|----------------|-----------------|-----------------|-----------------|
| | population set | Spearman's rho | p-value | Spearman's rho | p-value |
| whole genome | 1 (<i>cyd / mel-W</i>) | 0.280 | 4.17E-48 | 0.261 | 5.54E-22 |
| | 4 (<i>tim / mel-E</i>) | 0.349 | 2.69E-75 | 0.358 | 9.58E-41 |
| intermediate rec. | 1 (<i>cyd / mel-W</i>) | 0.129 | 1.52E-07 | 0.078 | 1.40E-02 |
| | 4 (<i>tim / mel-E</i>) | 0.146 | 3.14E-09 | 0.138 | 5.78E-05 |
| fused chromosomes | 1 (<i>cyd / mel-W</i>) | 0.189 | 1.14E-14 | 0.190 | 2.94E-08 |
| | 4 (<i>tim / mel-E</i>) | 0.260 | 1.58E-26 | 0.259 | 3.96E-14 |
| unfused chromosomes | 1 (<i>cyd / mel-W</i>) | 0.197 | 2.67E-10 | 0.175 | 4.88E-05 |
| | 4 (<i>tim / mel-E</i>) | 0.202 | 9.49E-11 | 0.211 | 1.23E-06 |
