

Suppl. Fig.1

The percentage of neointimal thickness change patterns between 3 and 9 years (A). The percentage of strut coverage change patterns between 3 and 9 years (B).

Contingency Analysis of Thickness Mean nominal change 10 μm By Stent type
Mosaic Plot

Contingency Analysis of Uncovered nominal change 1 strut By Stent type
Mosaic Plot

* The presented NIT change patterns need to be viewed at in the light of the thresholds of optical coherence tomography (OCT) resolution.
SES- sirolimus-eluting stent, PES – paclitaxel-eluting stent
