

Appendix A. Supplementary material

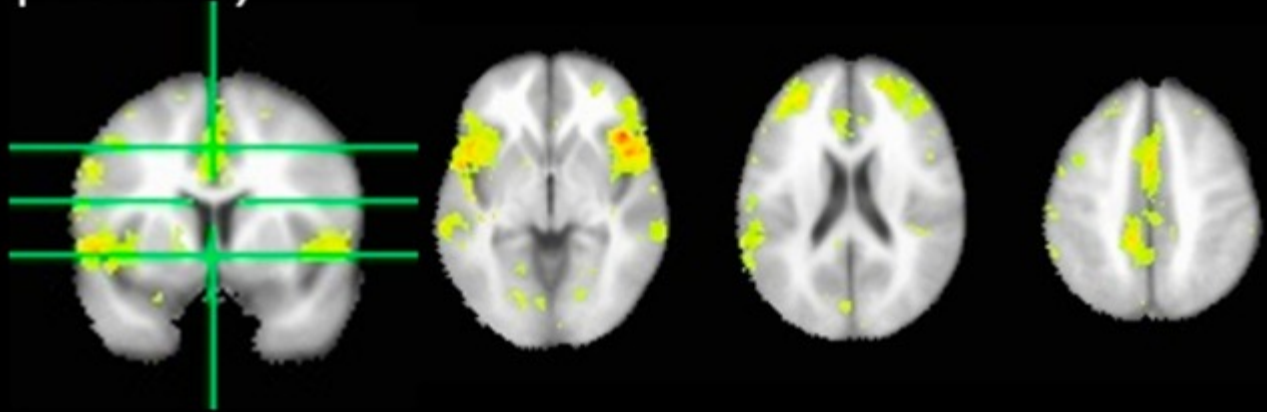

The following are the Supplementary data to this article:

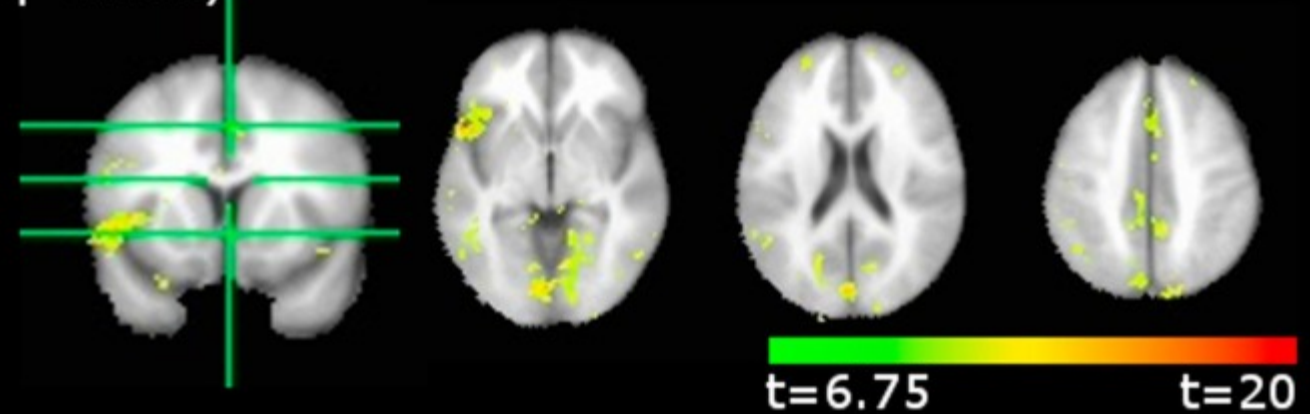

1. [Download high-res image \(283KB\)](#)
2. [Download full-size image](#)

Supplementary figure 1. Lesion coverage map by [spatial neglect](#) group (upper map A., without spatial neglect; lower map B., with spatial neglect). Hot color represents areas of stroke lesion overlap, with maximal overlap occurring in 6 participants in each group. Right brain is on the right side of image.

A). VAN in Participants without Spatial Neglect (FDR $q=0.0005$)

B). VAN in Participants with Spatial Neglect (FDR $q=0.005$)

1. [Download high-res image \(183KB\)](#)
2. [Download full-size image](#)

Supplementary figure 2. Whole-brain **functional connectivity** for the ventral attention network (VAN) by spatial neglect group (upper map A., without spatial neglect; lower map B., with spatial neglect). The FDR-corrected threshold is provided for each group. Right brain is on the right side of image.
