

Supplemental Table S2: Biodistribution data for [¹⁸F]α_vβ₆-BP in mice bearing paired α_vβ₆-expressing DX3puroβ6 and non-α_vβ₆-expressing DX3puro xenograft tumors at 1, 2 and 4 h p.i. and at 1 h p.i. after pre-administration of blocking peptide. Tissue uptake is expressed as decay-corrected percent injected dose per gram of tissue (dc % ID/g)
