

Table S2: Anti-hypertensive classes and generic medications

Medication Class	Medication Names
Angiotensin converting enzyme inhibitor	fosinopril, fosinopril sodium, ramipril, captopril, moexipril, lisinopril, enalapril, quinapril, trandolapril, benazepril, perindopril, monopril
Angiotensin receptor blocker	eprosartan, azilsartan medoxomil, olmesartan, valsartan, telmisartan, losartan, candesartan, irbesartan
Alpha-2 agonist	clonidine, guanfacine, methyldopa, methyldopate, guanabenz
Beta-blockers	betaxolol, acebutolol, atenolol, metoprolol, metoprolol succinate, metoprolol tartrate, nebivolol, bisoprolol, esmolol, propranolol, nadolol, labetalol, timlol, carteolol, penbutolol, pindolol, blocadren, carvidolol
Calcium channel blockers	nifedipine, diltiazem, verapamil, isradipine, felodipine, amlodipine, nicardipine, nisoldipine, bepridil, clevidipine
Diuretic	bumetanide, ethacrynic acid, ethacrynate, torsemide, furosemide, triamterene, spironolactone, amiloride, furosemide/amiloride, indapamide, chlorthalidone, metolazone, hydrochlorothiazide, methylchlorothiazide, chlorothiazide, bendroflumethiazide, bendrofluazide, polythiazide, hydroflumethiazide, cyclothiazide, benzthiazide
Others	aliskiren, hydralazine, minoxidil, hydralazine/isosorbide dinitrate, reserpine, eplerenone, spironolactone, prazosin, prazosin hydrochloride, terazosin, terazosin hydrochloride, doxazosin
