

Supplementary Fig. 2. Effect of the SOCE inhibitor SKF96365 on tunicamycin-induced Orai1 and STIM1 expression. HUVECs were preincubated with 1.25, 2.5, or 5 µM SKF96365 before treatment with 1 µg/ml tunicamycin for 24 h. Orai1 and STIM1 expression were assayed by western blotting. *p < 0.05 vs. control, n = 4.
