

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Geographical location of strains from 5 groups in North America.

File Name: Supplementary Data 2

Description: Sequence statistics for 74 newly sequenced genomes with Illumina.

File Name: Supplementary Data 3

Description: Twenty-five conditions used for high-throughput growth measurement.

File Name: Supplementary Data 4

Description: Library and sequencing statistics for the 48 transcriptomes.

File Name: Supplementary Data 5

Description: GO enrichment using GOrilla of pairwise comparisons with ranked gene lists using P-adjust.

File Name: Supplementary Data 6

Description: Reproductive isolation from spore viability of intra- and inter-lineage crosses.
