

**S2 Table.** All patients exposed to deferiprone compared to all patients exposed to deferasirox: Lab values indicating iron over-load (mean±SEM); Serum ferritin, SF; Hepatic iron concentration, HIC; (#), number of intervals; baseline, BL; follow-up, FU; significant p values, **bold**.

		Deferiprone All	Deferasirox All	
Number of intervals		70	62	
Number of patients		41	56	p value deferiprone vs deferasirox
