

**S1 Fig. Mapping of stimulatory 15-mer peptides in the BALB/c and C57BL/6J strains of mice.** Groups of mice were immunized using the ChAdOx1.FILOcep1+ChAdOx1.FILOcep2 prime and MVA.FILOcep1+MVA.FILOcep2 boost regimen and the immune splenocytes were tested using the IFN- $\gamma$  ELISPOT assay against 390 individual peptides corresponding to the FILOcep1&2 immunogens.
