

S13 Figure. Bar plots of HAPMIX admixture probabilities for major scaffolds (chromosomes) of *C. bursa-pastoris*. (a) Estimated admixture between *C. rubella* (dark red regions) and the European *Cbp_{Cg}* subgenome, relative to the Middle Eastern *Cbp_{Cg}* subgenome (green regions). Estimated admixture between (b) *C. orientalis* (orange regions) and the European *Cbp_{Co}* subgenome, relative to the Middle Eastern *Cbp_{Co}* subgenome (green regions). The limits of centromeric regions are indicated by vertical dashed lines.
