

This file contains meme motif search results for Loki Castle Viruses of Marseillevirus and Iridovirus groups

Marseillevirus marseillevirus (NC_013756.1) is included

The 'upstream' regions are from -250 to 30 nt related to the start codon; the regions shorter than 50 nt are filtered out

Meme search was set to 25 nt of motif width

Upstream region sequences and meme output files can be found at:
ftp://ftp.ncbi.nih.gov/pub/yutin/Loki_Castle_NCLDV_2018/meme_motif_search

Conserved motifs AAA(T/A)TGA are marked with the 'sun' sign
Conserved AT-rich motifs are marked with the 'moon' sign

note: on all Logo images, the detected motif starts from position #11
