

Supplemental Figure 3 Effects of CDK inhibitors on efficiency of iPSC generation in WT MEFs

a) Effects of CDK4 and/or CDK2 inhibitor treatment on efficiency of iPSC generation in WT MEFs.

b and c) Effects of CDK4/6 (b) and CDK7 (c) inhibitor treatment on efficiency of iPSC generation in WT MEFs. Inhibitors were added in the medium during reprogramming.

Data are representative of two or three independent experiments. Error bars, \pm SD.

** , $p < 0.01$, *** , $p < 0.001$ by two-tailed t test.
