

Onland W, Cools F, Kroon A, et al; STOP-BPD Study Group. Effect of hydrocortisone therapy initiated 7 to 14 days after birth on mortality or bronchopulmonary dysplasia among very preterm infants receiving mechanical ventilation: a randomized clinical trial [published January 29, 2019]. *JAMA*. doi:10.1001/jama.2018.21443

Data Sharing Statement

Data

Data available: No

Additional Information

Explanation for why data not available: De-identified individual participant data will be shared after completing and reporting the two-year follow-up of the study cohort. The data will be available for investigators conducting a regular or individual patient data meta-analysis on corticosteroid use in preterm infants.
