Supplementary File 3: Univariable analysis of factors predicting likelihood to report symptom improvement

Improvement in Photophobia[†]			
	Odds Ratio	**95% Confidence Interval**	**p-value**
Use of Artificial Tears	0.18	[0.05, 0.69]	0.012
Improvement in Dry Eye Symptoms[††] (DEQ-5 ≥6)			
Pre-Injection DEQ-5	1.27	[1.06, 1.51]	0.008

DEQ-5 = Dry Eye Questionnaire-5.
[†]Improvement in photophobia defined as ≥2 categorical improvement in any one question of the VLSQ-8.
[††]Improvement in dry eye symptoms defined as ≥3-point score decrease in DEQ-5.
