

Suppl. Fig. 1. PDL1 upregulation in OVCA420 cells in response to cisplatin

Supplementary Figure 1. PD-L1 expression in OVCA420 cells, exposed to cisplatin IC50 for 24, 48 and 72 hours. Untreated cells were used as a control, and isotype control for gating. Average values for the group and SD are shown. * $p < 0.05$, ** $p < 0.01$ Student t test.
