

Figure S1. Effect of *Atg5* on the expression of miR-103a-3p. The expression of miR-103a-3p in the *Atg5*-siRNA group was no different from that in the siRNA-Con group. There was no statistical difference between siRNA-Con and NC. All data are expressed as the mean \pm standard deviation. *** $P < 0.001$, vs. NC. miR, microRNA; *Atg5*, autophagy-related 5; NC, negative control; H/R, hypoxia/reoxygenation; siRNA, small interfering RNA; Con, control.
