

Dear students,

The following checklist is intended as a guide for learning practical and theoretical skills during the bedside teaching in anaesthesiology.

Checklist for learning skills during the bedside teaching in anaesthesiology:

Name: _____

- Basic monitoring set up
- Preoperative checks performed (incl. patient identification, nil-by-mouth, allergies, intubation hindrances, procedure identification, patient clarification)
- Intravenous cannula inserted (on anaesthetised patient)
- Mask respiration performed
- Demonstration received of the intubation procedure
- Clinical examination performed (in particular, auscultation of heart and lungs, determination of pupil status)
- Infusion prepared and demonstration received of medication labelling
- Demonstration received of a transfusion as per the transfusion guidelines
- Bedside test performed
- Demonstration received of administration of a general anaesthesia (“9 steps”)
- Demonstration received of the basics of artificial respiration
- Demonstration received of the basics of anaesthesia
- Demonstration received of extended monitoring (arteries, CVC; indication and measured values).
- Participated in “team timeout”
