Table S1.

Variable	1	2	3	4	5	6	7	8	9
1 <u>C</u> onceptually accurate	—	.48**	.59**	.70**	.56**	.77**	.46**	-.39**	-.01

*Intercorrelations between study variables*

2	<u>O</u> bservant and responsive	—	.71**	.69**	.78**	.85**	.47**	.00	-.03
3	<u>A</u> ctively structures		—	.78**	.71**	.88**	.50**	-.08	-.09
4	<u>C</u> orrective feedback			—	.75**	.91**	.51**	-.07	-.09
5	<u>H</u> ope and motivation				—	.88**	.54**	-.09	-.14
6	COACH composite score					—	.58**	-.15	-.09
7	Caregiver engagement						—	-.26**	-.12
8	Study Condition							—	-.01
9	Session Length								—

*Note.* \*\*  $p < .01$ .

Table S2.

*Intraclass correlation coefficients (ICC) and 95% confidence intervals across conditions*

	Early Steps Efficacy Trial	Community Implementation	Community Services as Usual	Overall	
	Mean (SD)	5.14 (1.36)	4.46 (.99)	4.13 (1.28)	4.65 (1.27)
Complete Sessions	ICC (90% CI)	0.82 (.34   .96)	0.71 (.24   .88)	0.67 (.20   .96)	0.75 (.48   .86)
	$\alpha$	.97	.90	.93	.93
	Mean (SD)	4.73 (.90)	4.38 (.87)	3.88 (.97)	4.37 (.96)
Segments	ICC (90% CI)	0.76 (.22   .94)	0.34 (.10   .67)	0.41 (.05   .94)	0.61 (.31   .84)
	$\alpha$	.89	.88	.92	.90

*Note.* SD = standard deviation. ICC = one-way random effects model intraclass correlation coefficient.  $\alpha$  = internal consistency.
