

**Immunologic markers in the progression of Parkinson disease**

**Questionnaire for the survey of demographic data, medical history, disease status and other factors of Parkinson and non-Parkinson individuals in the Colombo District, Sri Lanka.**

- This survey is carried out for an academic research by an undergraduate of University of Colombo.
- Confidentiality of all information is carefully guaranteed, and no information by which you can be identified will be released, presented or published. The data will never be used in such a way that you could be identified in any way.

Patient ID no: .....

Date: .....

**1. Subject Group**

- Parkinson Disease (PD)
- Other neurological disorders
- Normal healthy individuals

**Demographic data**

**2. Age:** .....years

**3. Sex :** Male / Female

**4. Residential address and Contact details**

.....

.....

.....

**5. Highest educational level**

GCE Ordinary Level.....

GCE Advanced Level.....

Graduate.....

Other (Specify).....

**6. Occupation (past / present)**

.....

**7. Past medical history**

Chronic diseases and duration

Diabetes mellitus.....

Hypertension.....

IHD.....

Malignancies.....

Neurological diseases (specify).....

Other (specify).....

Tobacco smoking – pack years (current or past).....

Alcohol intake – units per week x years (current or past).....

**8. Drug history**

Name of drug

Start date

.....

.....

.....

.....

**9. Family history of PD**

.....

.....

**10. Parkinson disease**

Date of onset of symptoms: .....

Duration since onset of symptoms: .....

Date of diagnosis: .....

Duration since diagnosis: .....

Diagnosed by Physician / Neurologist / other (specify): .....

**11. Motor symptoms**

Motor symptoms	Right	Left	Bilateral
Tremor			
Rigidity			
Bradykinesia			
Postural instability			
Reduced arm swing			
Micrographia			
Mask face			
Freezing of gait			
Dyskinesia			

**12. H-Y scale of disease**

Hoehn and Yahr stage		
Stage	Description	
0	No signs of disease	
1	Unilateral disease	
1.5	Unilateral plus axial involvement	
2	Bilateral disease without impairment of balance	
2.5	Mild bilateral disease with recovery on pull test	
3	Mild to moderate bilateral disease; some postural instability; physically independent	
4	Severe disability; still able to walk or stand unassisted	
5	Wheelchair bound or bedridden unless aided	

**13. Non-motor complications**

<b>Non-motor complications</b>	
Memory impairment	
Hallucinations	
Depression	
Sleep disturbances	
Postural dizziness	
Constipation	
Loss of smell
