

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: 1215 proteins were identified after LC-MS/MS analysis at 1 % FDR when searching the searching against the TIGR4 library (Swiss-Uniprot ID - UP000000585) . The table shows protein identification, uniprot accession number and spectral counts derived from pneumococcal strains. The spectral count data is presented in a raw non-normalized format.
