Additional file 6

BPP

others

- structural constituent of ribosome
- DNA binding
- signal transducer activity
- mRNA binding
- cytoskeletal protein binding

Molecular Function

- ■peptidase activity others
- kinase activity
- ■oxidoreductase activity ■RNA binding
- phosphatase activity
- transferase activity, transferring acyl groups
- ■isomerase activity
- DNA binding
- structural constituent of ribosome
- mRNA binding
- transcription factor binding
- ■peptidase activity
- kinase activity
- oxidoreductase activity
- lyase activity
- ■isomerase activity transferase activity, transferringglycosyl
- ATPase activity
- enzyme binding

- others
- signal transducer activity
- ■DNA binding
- mRNA binding
- structural constituent kinase activity of ribosome
- GTPase activity
- cytoskeletal protein binding
- methyltransferase activity
 - peptidase activity lipid binding
- transferase activity, transferring acyl
- oxidoreductase activity
 - transferase activity, transferring glycosyl
