

Supplementary Table S2: The combination of variant types of *CDHR1* in CRD patients.

Genotype-disease analysis in CRD		
	Patient numbers	Percentage
LLP/LLP	22	84.6%
LLP/Mis	4	15.4%
Mis/Mis	0	0%

The variant types of *CDHR1* in CRD patients described in the literature¹²⁻¹⁸ were analyzed for type (LLP or Missense). The siblings analyzed in this study were also included. See the text for the definition of LLP. LLP/LLP means homozygous or compound heterozygous of LLP, and LLP/Mis means compound heterozygous of LLP and a missense variant.

CRD: Cone-rod dystrophy
LLP: Large-scale loss of protein
Mis: Missense
