

Supplemental Material

Supplemental Table 1. Predictive Value of the CHA₂DS₂VASc score for 5-year Ischemic Stroke Risk

Group	n	Stroke*	C-Statistic†
Any abnormal p-wave index‡+no atrial fibrillation	4345	69	0.682 (0.617-0.748)
Atrial fibrillation	2229	105	0.636 (0.577-0.695)

*Number of ischemic strokes in 5 years

†C-statistic of CHA₂DS₂-VASc score for ischemic stroke

‡Advanced inter-atrial block, prolonged P-wave duration, abnormal P-wave axis, abnormal P-wave terminal force in V1
