eFigure. Graphs of Individual Performance-Based Tests Over Time

Abbreviation: PT, Physical Therapy.

Data are the means for each performance-based test for baseline, 3 months, and 6 months. 6 minute walk test assesses the distance covered while walking during 6 min, gait speed is calculated during walking over 40-meters, stair test measures the time to go up and down a set of 11 stairs, single leg stance test records the time balancing on one leg while keeping the hands on the hips, chair rise test measures time during 5 repetitions of rising to a full upright position and sitting back down in the chair, and sitting/rising test assesses the ability of participants to sit and rise from the floor.

eTable 1. Performance-Based Tests Over Time in Study Arms

	Baseline N Mean (SD)		3 months N Mean (SD)		6 months N Mean (SD)		Δ Ba to 3-mo	Δ% to 3-mo	Δ Ba to 6-mo	Δ% to 6-mo

High symptom self-efficacy		-3.88 (-6.89; -0.87)	-2.57 (-5.62; 0.48)	-1.31 (-3.78; 1.17)
Low symptom self-efficacy	6	-2.18 (-5.59; 1.24)	0.83 (-2.52; 4.19)	-3.01 (-5.81; -0.21)
High symptom self-efficacy		-2.07 (-5.18; 1.04)	-2.36 (-5.53; 0.80)	0.29 (-2.26; 2.85)

Abbreviation: WOMAC-PF, Western Ontario and McMaster Universities Osteoarthritis Index Physical-function Scale.

a Time points 3 and 6 correspond to 3 and 6 months follow-ups.

b Anxiety assessed by Beck Anxiety Index (anxiety defined by values \geq 8). Depressive symptom assessed by the Center for Epidemiologic Studies Short Depression Scale (depression defined by values \geq 10). Due to low prevalence, individuals were classified as having either anxiety, depression, or both.

c Fear of movement measured by the Tampa Scale for Kinesiophobia (medians were used as cut-offs).⁶⁶

d Self-efficacy measured by the Arthritis Self Efficacy Scale (medians were used as cut-offs).³³

* p-values < 0.05 for the subgroup-treatment effect interaction.

** p-values < 0.01 for the subgroup-treatment effect interaction.

Bold values denote mean difference and 95% CI for significant subgroup-treatment effect interaction.
